	(Do not close Action Item until notified by Originator)

RTM Change [X]   Start New Baseline [ ]

Problem
Currently, the Release B DPS design components and their links to Level_4 requirements do not exist in RTM MAIN. The RTM Component Class should be populated with the DPS components and linked to their corresponding Level_4 requirements.

Proposed Solution
Populate the Component Class of RTM with the Release B DPS components. Secondly, update the Level_4 requirements' verification status fields in the data base in order to make the corresponding component links. Finally, link the components to their corresponding Level_4 requirements of the Level_4 Class. This CCR will load only the components developed by Release B. The Release B Level_4 requirements that reside in RTM will be linked to Release A and Release B components via this CCR.
